

[7 Steps to **GETTING STARTED**]

Step 1

- Pray and Identify Christian students at your school. (Gather: names, church they attend, cell number, email)

Step 2

- Meet with them and share the vision of FISH!
- *If a Christian club already exists, the FISH organizational strategy may be implemented through that club to make it more gospel advancing.

Step 3

- Secure an adult from your church and 2 faculty members (1. FISH Club & 2. Worldview Club) at your school.

Step 4

- Request permission from the school administration.
- *Only students can start clubs! Official club status or recognition is not the objective. The only goal with administration should be obtaining meeting places.

Step 5

- Determine meeting time and promote both club kick-offs.
- *There is no perfect time to have a club meeting. This plan is the framework, do what works best for your situation.

Step 6

- Promote the meeting time for your school's club at churches in the community.
- *Posters, announcements, and social media posts may be helpful, but the churches in the community should be the driving forces behind the club.

Step 7

- Start the Fishing Cycle. All the info needed to start the Fishing Cycle is provided at skopos.org/evangelism
